

Git Workflow

- **Untracked**
- **Tracked**
- **Staged**
- **Commit**

Repository?

- **Storage location for your code and its history.**
- **Can be local or remote.**
- **Tracks all changes to your project files.**

Working Directory?

- **Location where you work on your code.**
- **Changes made here are not yet saved in
Git's history.**

Local Repository?

- **The version of the repository stored on your computer.**
- **You use it to make commits and view the version history.**

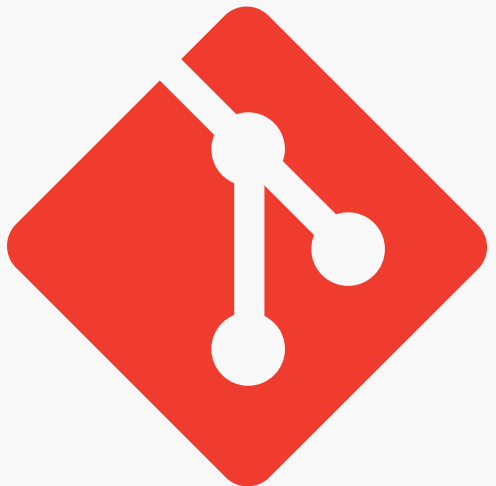

Remote Repository?

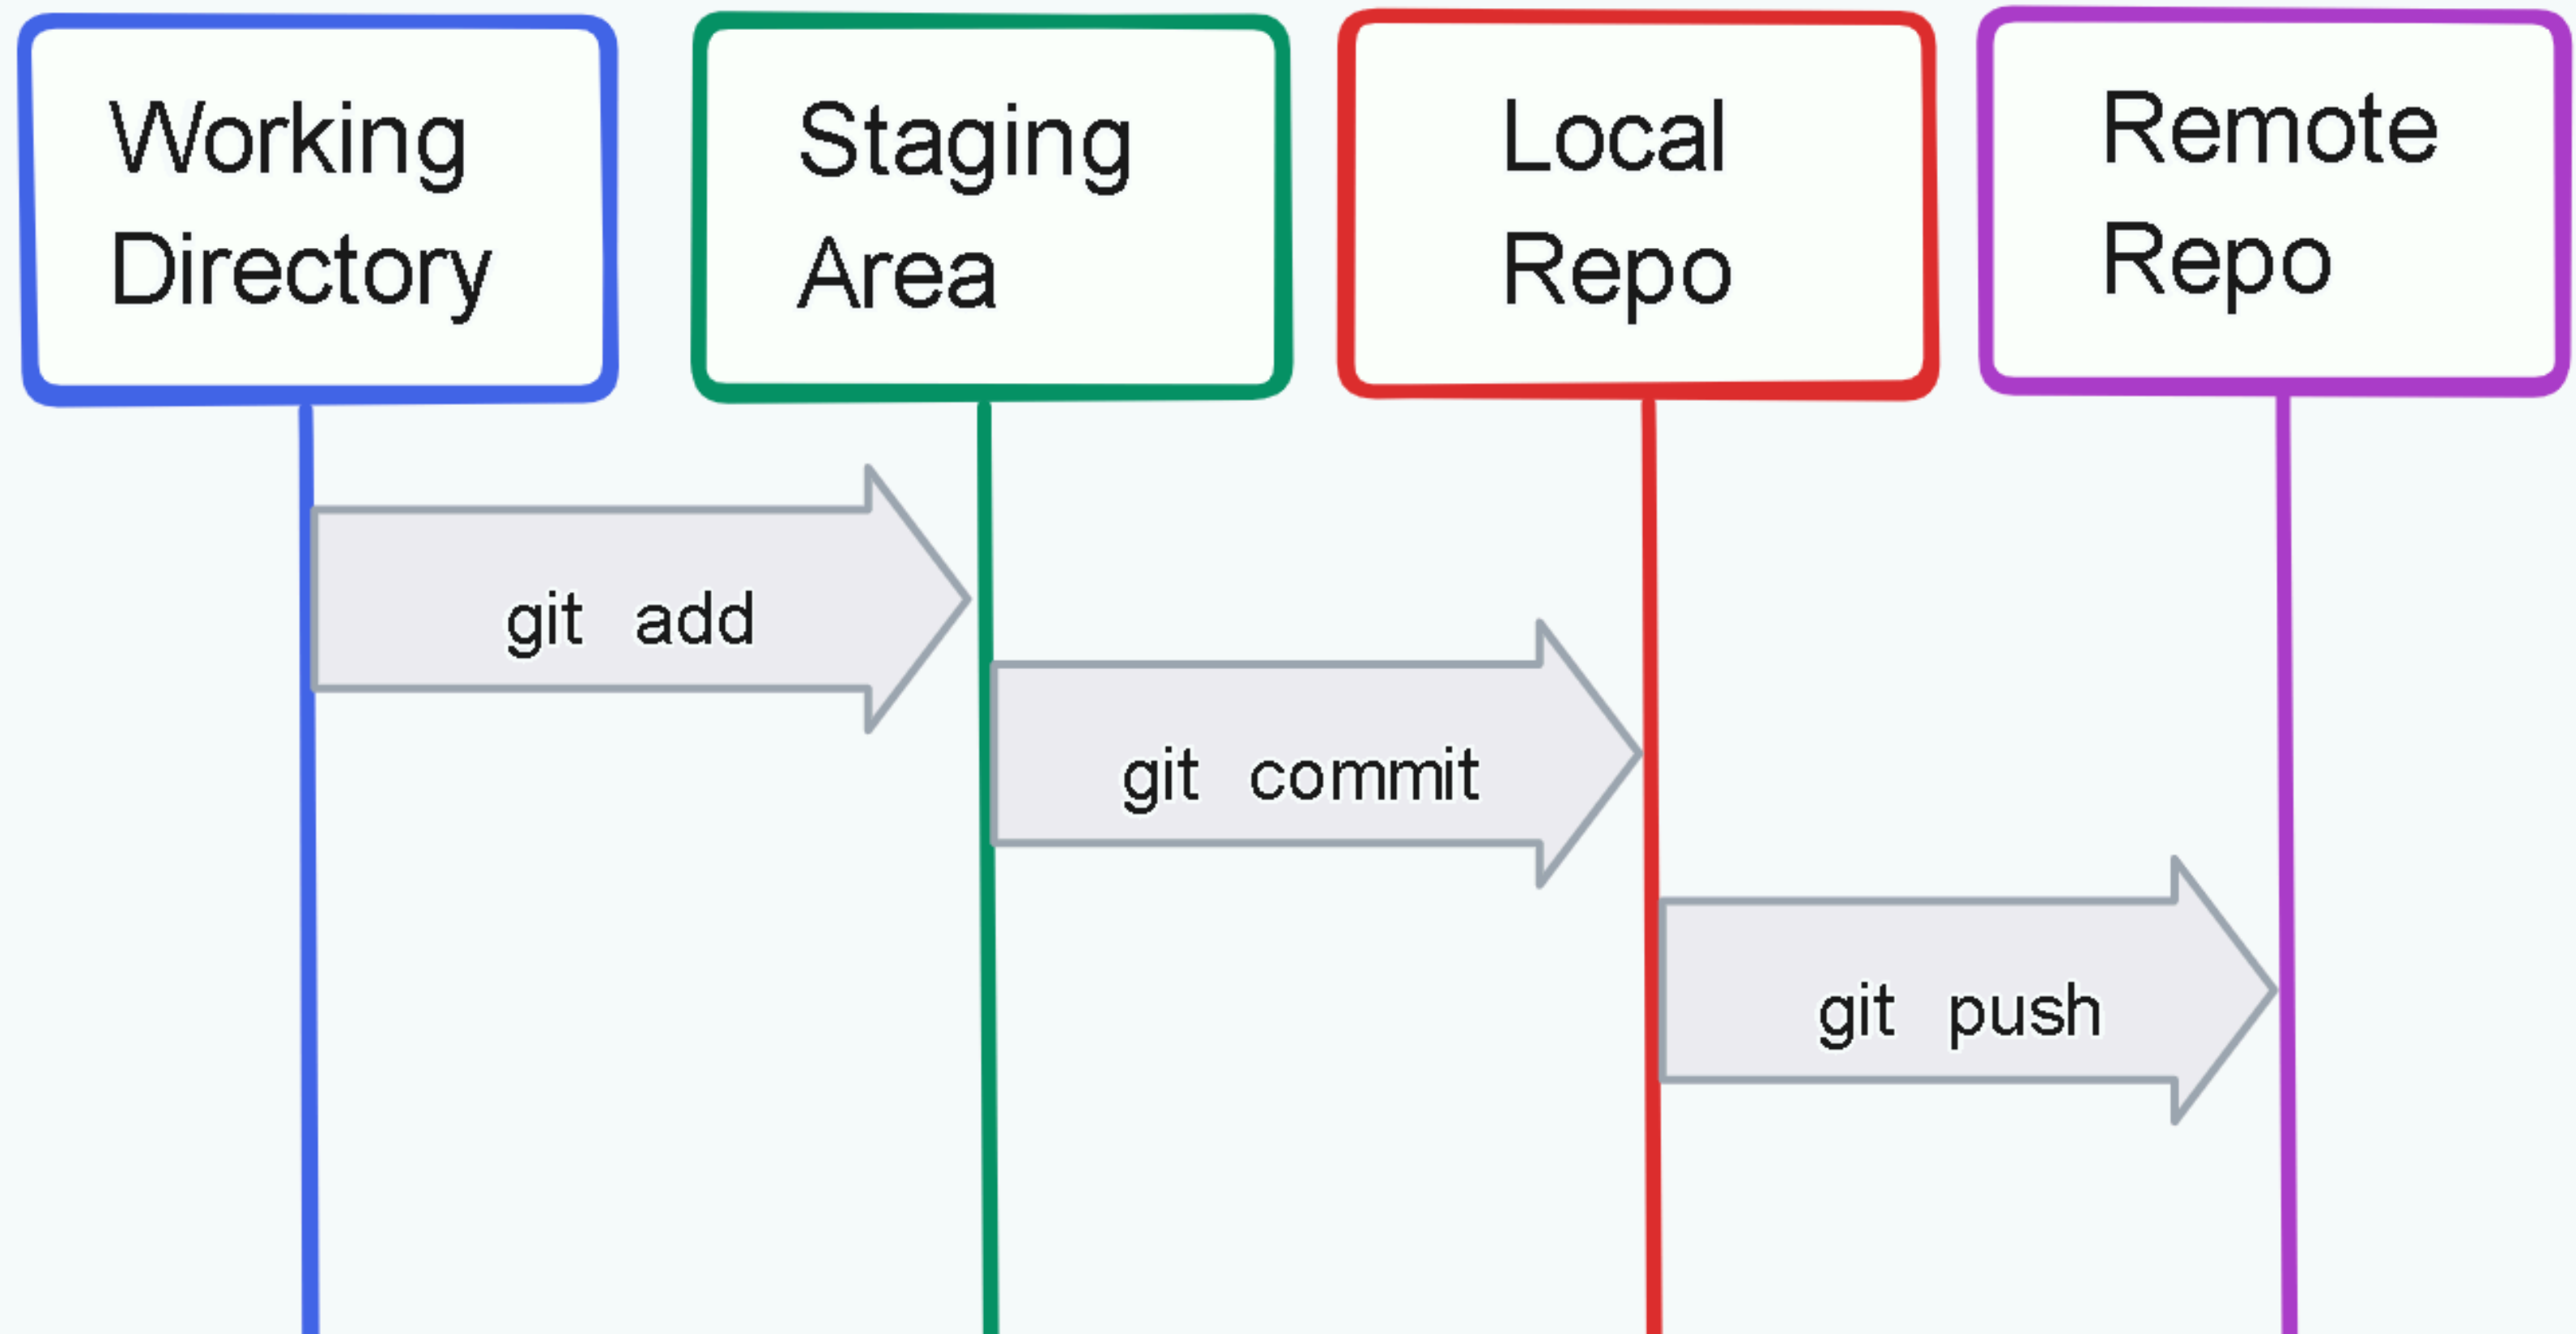

- **The version of the repository stored on platforms like GitHub.**
- **Used to share your work with others or collaborate on projects.**

Git Workflow?

Thank you
