

GitLab Runners?

- **execute CI/CD jobs in a pipeline.**
- **run scripts defined in `.gitlab-ci.yml`.**
- **Can be shared, group, or specific runners.**

Shared vs. Group vs. Specific Runners

- **Shared Runners**
- **✓ Managed by GitLab, available for all projects.**
- **✓ Ideal for small to medium projects.**
- **✓ Used for public repositories by default.**

- **Group Runners**
- **✓ Available for all projects in a specific group.**
- **✓ Useful for teams working on multiple projects.**
- **✓ Controlled by group admins.**

- **Specific Runners**
- **✓ Dedicated to a single project only.**
- **✓ Best for private repositories and custom configurations.**
- **✓ Installed & managed by the project owner.**

Thank you
